Members discussed the idea and history of previous allotments being used by Community groups and the idea of a Community Garden.

It was identified through discussion that when Central Bedfordshire Council was merged, Mid Bedfordshire and South Bedfordshire districts had different grass cutting schedules which includes South Bedfordshire receiving up to 14 cuts per annum.

It was suggested that the Council write to CBC asking for an explanation as to why the cutting schedule was different for mid and south Bedfordshire. It was discussed that different aspects of the Town needed a variety of schedule cuttings; however, it was felt that there should not be a requirement for FTC to pay extra to CBC to cut CBC land. ## Report to Community Services : Cost of Living Crisis Community Allotment

Implications of recommendations
Corporate Strategy:
A Council to Deliver
An Engaged Community
A Sustainable Environment
Monitoring Progress

Finance: Application to the National Lottery Fund - Cost of Living Strand

**Equality: Access for All** 

#### Background

FTC resolved to make the cost-of-living crisis a priority initiative.

FTC has established a Cost-of-Living crisis working group, including members from local businesses, organisations, and Ward Councillors. The Community Services Assistant has been working on expanding the offer of the community Fridge. Collections are now being made from the Co-op, Tesco, SOFEA and Aldi.

As reported at the previous meeting the supply of fresh vegetables has been an issue for the community fridge. During the summer months this has been supplemented by allotment holders donating their excess harvest and residents attending the community hub on Wednesday growing a summer harvest in a planter. The growing project has made a difference to the users engaging them in the growing and watering process, rather than sitting all day they are up and moving, engaging with one another.

#### Introduction

The Community Allotment project is not just about growing food. It is a space where residents can come together, to support mental health and build community engagement by all ages. At the last meeting members asked the CSO to investigate alternative sites for a community growing project.

#### Planters at the Barclays site

Location the site is central, however as the site is open there is no security and is open to vandalism. There is no storage for equipment, and it would only accommodate one planter. There would be no space for those working the allotment to sit and talk. No access to water, rainwater capture or composting.

#### The Hub

Increasing the number of planters at the Hub. While this would allow 2 planters to be placed at the edge of the fence, it would not substantially increase the number of crops that could be harvested. As the Hub is a youth space it would not be possible for residents to access the space most of time. There is no storage for equipment. There would be no space for those working the allotment to sit and talk. There would be access to water, however there would be no space to capture rainwater or compost bins.

#### The Rufus Centre

The space by the dance studio has been suggested as a space. There is space for 3 planters, a shed for equipment would reduce this it would not be aesthetically pleasing or be secure. There would be no space for those working the allotment to sit and talk. No access to watering or ability to capture rainwater. The volunteers would have access to the Rendezvous café; however, the cost of refreshments would be an issue for volunteers who come on a regular basis.

There is space along the hedge fence on Stepplingley Road. The ground is sloped and overshadowed by large trees and would not be suitable for growing.

#### Why an Allotment

A community allotment based in the current allotment site would be the most appropriate site. The size of an allotment (5 pole) would allow for raised beds, a shed and lean to for volunteers to sit, enough space for water capture (run off from the shed) and composting, and no dig beds.

It offers a way for a broad mix of people to work together, sharing tasks and skills. It creates opportunities for educational workshops, social gatherings and enjoying nature. As a priority to be open and accessible to all, regardless of background and ability. There would be access to other allotment holders who can offer advice as part of the allotment community.

#### **Project Aims**

To provide a sustainable food source for the community, to teach people how to grow food, improve mental health and engage all ages in the project:

- Present an answer to the environmental challenge by encouraging people to take an interest in where their food comes from and how it is grown.
- Encourage wellbeing and combat social isolation in the local community by providing a safe and welcoming space for people to come and spend time together. The pandemic has meant that this is even more of a priority.
- Address food shortages in the local area, to supply the community fridge with the excess food.

#### **Running the Allotment**

The allotment will be managed by the CSO with the core volunteer group, residents who are ready to support the running of the allotment. One member of the group has already indicated that he will be the lead volunteer and will be responsible for opening and closing of the allotment whole we build the core group and roles.

The allotment project would be put on the 'DolT' website. The allotment is open to anyone from the local community, with word of mouth an important way for people to find out about the project. These volunteers have sited different reasons for becoming involved: some because they want to learn more about gardening or because they care about being involved in a sustainable project for the future and want to do something for their community; some because they are retired and want to be active; some have cited having a purpose and improving their mental health.

Holding regular volunteer days as the project evolves helps to ensure that new people continue to be introduced. Another way of drawing new people in is to plan workshops on specific topics such as composting, bread-oven making or bee keeping.

#### **Impact**

The project would be used to demonstrate the impact Flitwick Town Council has in the community. The project would collect quantitative and qualitative data. The collection of data would be mapped through a social return on investment (SORI).

#### Mental Health

People make friends and there is a sense of community. One of the most important benefits for those using the garden is the social connection. Referrals could be made from the social prescribing service. The allotment would address social isolation and give participants a sense of purpose. The CSO has been made aware of some allotment holders who are having difficulty in maintaining their plots due to age and mobility issues. These allotment holders do not want to give up their allotment as it is a way of them being active and maintaining social ties with others. These gardeners may be willing to join the community allotment where they can still grow and interact without the responsibility of maintaining a whole plot. This could potentially free up more allotments for residents on the waiting list.

#### Physical Health

The use of planters on part of the site would allow those with disabilities to be engaged in all areas of the growing process. Maintaining physical health and activity is recognised to be of benefit to volunteers.

What information will be collected:
Core volunteer group number of volunteer hours
Number of residents engaging in the project
Number of hours spent at the project.
Number of children engaged in the project.
Ethnicity
Age
Postcode

#### How will it be funded?

An application to National Lottery, recently the lottery has increased the amount of funding that is available through this scheme to £20K. The application would cover the costs of raised beds and paths to enable disabled residents to access and grow vegetables have been priced into the application along with soil, adaptive tools etc. Funding would be allocated to plants for the new growing season. DBS checks for volunteers to work with vulnerable adults and children.

#### **Additional Matters**

The funding applied for to the National Lottery is to cover all the costs of setting up the community allotment as described above.

#### **Options**

- 1. Members agree to the setting up of the Community Allotment
- 2. Members agree to Community Services Officer time to develop and manage the Community Allotment, including volunteer handbook, risk assessments and relevant policies.

#### **Officers Recommendation**

Apply to the National Lottery – Cost of Living Strand to support the Community Allotment

#### Introduction

The RBL will be marking the 80th anniversary of D-Day in June 2024.

The RBL are asking for the occasion to be marked with a Beacon Lighting at 9:15pm on Thursday 6<sup>th</sup> June.

Should Members consider purchasing a beacon, there are two options available. A beacon that could be permanently installed, this would require planning permission or the purchase of a 'portable' beacon. Both options are detailed below:

The three areas officers have identified for possible installation sites for option one or two, are 3 Station Road, Station Road Green Space or Millenium Park.

## Report to Community Services 3<sup>rd</sup> September 2023: Scarecrow Festival

Implications of recommendations

**Corporate Strategy:** An Engaging Community **Finance:** Scarecrow Festival - 313 / 4206

Equality: Access to all

**Environment:** Work to improve health and wellbeing

## **Background**

Each year hundreds of villages all over Britain bring colour, vibrancy and fun to their village or town by organising Scarecrow Festivals, where residents compete with each other to build the best scarecrow from whatever material they can lay their hands upon — pots and pans, tree stumps and branches, broken furniture and discarded clothing.

The scarecrows are then displayed outside their home, in their gardens or on the streets, for all to see.

The festival is open for all to enjoy, from schools, groups, business and individual homes – anyone is welcome to display a Scarecrow, no matter how big or small.

#### Introduction

Scarecrow Festivals have been growing in the UK since 1990, with many local Central Bedfordshire villages taking part each year.

A Scarecrow Festival is something the whole community can enjoy and take part in. Each year would have a different theme that adults and children can relate to and get inspired about.

#### **Additional Matters**

Every year we have had a different theme for this event, it was requested by the Community Services Committee to have options brought to decide as to the 2024 theme.

Officer recommendation after researching Scarecrow Festivals is to move the festival to September to coincide with the harvest and holding the festival over one weekend.

## **Options**

- 1. To consider the annual Scarecrow Festival being held in September 2024 over one weekend.
- 2. To consider holding the event with the theme Pirates.
- 3. To consider holding the event with the theme Childrens Films
- 4. To consider holding the event with the theme Fairy tale Characters
- 5. To consider holding the event with no theme

Zoe Putwain Community Services Officer

#### Manor Park

Manor Park is an area on the western end of Flitwick of former parkland in two areas of permanent pasture divided by a mature wood.

The whole area is encompassed by a long-term Higher-Level Stewardship agreement which restricts the opportunity to manage the area efficiently. The vegetation has previously managed by a grazing regime but this has been discontinued for safety reasons as cattle and dog walkers are not a good combination.

With little intervention the pasture is in the process of slow decline which eventually will lead to rewilding. The original sward has been replaced by an indigenous grasses and coarse weeds including Thistles, Brambles, Ragwort and Hogweed. It was noted that saplings are growing in the protected zones made by these coarse weeds.

Issues have arisen with the pernicious spread of Thistles and particularly Ragwort within the Park and patches of Hogweed have been introduced either by dumping waste or mammals. The Thistles and Ragwort are covered by the 1959 Injurious Weed Act. Hogweed is not covered under this act but can be considered as a threat.

#### Hogweed

This plant has established in distinct patches of a limited scale. These areas can be contained by the limited use of TRICLOPYR, a highly effective very selective herbicide applied by Knap sack application, combined with limited cutting which would virtually eradicate the problem in a few years.

## Ragwort

This is a much more serious issue as the plant is widely established in the two areas of pasture North of the brook. South of the brook the conditions are not conducive to a wide spread invasion of Ragwort. The plant can be kept in control by regular rogueing by volunteers.

However, the two areas of pasture North of the brook are widely infested and would be impossible to hand rogue.

To have an immediate effect these areas require cutting and removal to weaken the plants and removal of any toxic parts of the plant to protect the public and their animals. This material needs removal from the site as it is at its most toxic when cut. After the removal of the Ragwort the regrowth is vulnerable to chemical treatment.

There are several options for reduction and control based around hormone herbicides and the later products based around AMINOPYRALID and CLOPYRALID but are restricted in their use by pasture type and usage.

Before a programme can be devised it would require permission to be sought and approval from Natural England.

In summary, the major problem is the Ragwort as there is a duty of care by the landowner to control the spread of the weed from their land to a neighbour under the 1959 Act. Ragwort is most toxic once cut so for public and animal protection it needs to be removed. These problems have occurred over a long period of time so unfortunately will some time to correct to a level were had rogueing will give adequate control.
